## FROM THE BRIDGE ☆☆☆

August, 2013 - Vol. 22, Issue 6

### Commodore Gayle Fisher-Mulvey

Hello all!

I hope everyone is having a fantastic summer and that YOUR Club is playing a huge part of your festivities! It sure is busy at the Lake. Our Board is working hard to

keep everything going smoothly with lots of options and activities for our members to enjoy.

Not only is the Board working hard, a huge Thank You to Mike and Ann Fornataro for the Car Show! It was amazing with all the different cars. I admire anyone with that kind of passion and thank you to Mike and Ann and all of their volunteers for making it happen!

September marks the end of my tenure as Commodore. It has been an honor to serve as Commodore this year (more about that in next month's Log). Election Day and the Annual Meeting will be on September 15. Anyone interested on becoming involved with the Board of Governors is very welcome to throw their hat in the ring. Any Board member can provide you with information as to the process of running for the Board. Be sure to attend and cast your vote and enjoy the festivities on the porch.

I look forward to seeing everyone at The Club.

Hi. Member Mike Fornataro and his committee held a great BLYC Car Show! We had 107 cars registered for judging. WOW! Thanks to Dwight Shrigley, Jeff Lyons, Paul Sanzone, Chuck Wadley and Ann Fornataro. Special thanks to all of the sponsors as well.

It is summer and participation at the Club is great. Because of more sales our ROI (return on ingredients) is much better the last two months translating into better income for the Club.

Please contact your Governors for any questions that you might have as they pertain to the various positions that each Governor is responsible for.

**COME IN AND ENJOY YOUR CLUB**

Ahoy Mates! Well, the summer is going by quickly. I think the rain for 19 days in a row stole a large hunk of summer. By the time you read this, we will be a month removed from the 4th of July with less than a month to go in the unofficial summer. Labor Day will be here before you know it - which reminds us to take advantage of the time remaining to enjoy the club and sailing. There is still time to come to the sailboat races on Sunday afternoon at 2:00 as a participant or spectator. Interest in both has increased lately.

We have finished the Spring series of the Lambrecht Cup Racing and are in the middle of the Summer series. The winner of the Spring series was the Bob Snow team. In a close finish for second place, the Bill Reynolds team edged the Don Harris team by 4 points. Kudos to the Harris team, which is probably the most improved of all the sailors. Rounding out the standings were the

Chuck Bendig team, Wes Cartwright team, and new to sailing Chuck Gleich team, which unfortunately did not have as many attempts in the keelboat class. In the One Design class, participation was too sporadic for determining a true champion for the spring series. Steve Goodyear and John VanGuilder teams were frequent participants.

The 4th of July Long Distance Race had 7 boats and was won by the Bob Snow team and the rest of the order of finish was as fol-

lows: Steve Goodyear; Chuck Bendig; Bill Reynolds; Michael Davis and Colin Guthridge; Don Harris; and Walter Grub with Matthew Davis and Keegan Christie.

A sailor's salute goes out to the Sailing Team who has given a lot of time and effort this summer so others can sail. I have been fortunate to have four former Racing Governors on the team. Don Day, Tom Baltzel, David Luttenberger, and racing guru PC Steve Harris have been invaluable to me and the sailors. Also, plaudits go to our photographer Karen Baltzel and Sally Day.

Come on out and support sailing at the Club. Here are a few lines of a sailing song called "Tin Cup Chalice" by Jimmy Buffett:

*"Yeah now, the sun goes slidin' cross the water*

*Sailboats they go searching for the breeze*  
*Salt air it ain't thin*

*It can stick right to your skin and make you feel fine"*

*Recently, we've been hearing a lot in the news about Buckeye Lake, in particular the seawall along the northbank that makes it a lake. Looking through the archives, one discovers that not only has our lake not always been a lake, but the changes it has undergone are many. Reproduced below is the April, 1980 history article from then Club Historian, P/C Howard "Whitey" Limes detailing the history of our lake and how it came to be known as "Buckeye Lake."*

## Did You Know ... How Buckeye Lake Got Its Name?

Actually what is now known as Buckeye Lake was formed by the gouging, grinding, and bulldozing effect of the last of the Ice Age glaciers.

A deep depression was left to the west of what is now known as Licking Hills. Into this depression flowed the waters of the melting ice and snow from the melting glacier. This created the infant Buckeye Lake.

The prehistoric Indians found Buckeye Lake beside a trail that they used traveling between the Ohio River and Lake Erie. They called it Big Pond. The swampy, marshy area around Big Pond, they called Big Swamp. It made an ideal spot for the Indians to rest, find food in all forms of wild life, before portaging their canoes from Great Bend in the South Fork of the Licking River to Walnut Creek of the Scioto.

Twenty five years before the Revolution, in 1751, the Ohio Company appointed one, Christopher Gist, because he got along well with the Indians, to "Spy out the lands." He was the first white man in the lake area. While en route, Gist stopped long enough in Coshocton to hold the first Christmas service in Ohio, for the white traders and Indians.

After the Revolutionary War, the new federal government appointed Elnathan Schofield, a surveyor, to lay the area around Big Pond out in plats of 640 acres each.

## Looking Aft

### P/C Steve Harris, Club Historian

These plats were used to pay the Canadian veterans of the war against the British. At that time the Pond was five miles long, and between four and five hundred yards wide. These plats are shown on a map, made and signed by Schofield in 1801. This map was found in the basement of the Statehouse in Columbus, Ohio in 1910.

(Editor's Note: Schofield's map was reproduced in 1910 by A.H. Sawyer, a draftsman with the State Board of Public Works. Sawyer's maps are reproduced in A Story of Buckeye Lake by Joseph Simpson, available on the BLYC website.)

The present shoreline of Buckeye Lake roughly follows the border of the Big Swamp. The present form of the lake resembles the contour of the Big Pond.

In the early 1800's, the only means of transportation, to and from the markets was by horseback, backpack, and canoes over trails of the Red man. One such trail was near the west end of the Big Pond.

Any development of proper transportation facilities at that time was physically and economically impossible. Add to this, the problems of the pending and resulting War of 1812.

The completion of the Erie Canal in 1823 was a ray of light for the people in and around the Big Pond.

In February 1825, after two years of consultation, the General Assembly of Ohio passed a resolution authorizing construction of two canals in Ohio. One of these canals would be near the end of the Big Pond.

On 4 July 1825, the first spade full of earth was turned over at the spot now marked by a stone monument and part of the remains of "Taylor's Locks" on Rt. 79. This was the start of the canal.

The need for the storage of "Locking Water" required the raising of the level of the Big Pond. This was accomplished by building an embankment at the west end of the Big Pond extending from Seller's Point to Sunfish Point by way of Onion and Fisher's Islands.

In 1830, five years after the first spade of earth had been turned over at Licking Summit, the Big Pond was filled and ready to life canal craft over the Licking Scioto divide. At that time Big Pond became known as the Licking Summit Reservoir.

The rapid increase of the size of the canal fleet soon proved that the existing reservoir was inadequate to supply the necessary water. So an additional reservoir was created. This was done by putting up a new embankment west of the old reservoir, creating a new reservoir of about 500 acres. This new area is now known as the "New Lake" as shown on the chart of the lake in Gob's Mess at BLYC.

The lack of maintenance during the Civil War days, the ravages of time and the coming of the railroads to the lake area soon reduced the canal traffic to the extent that it was no longer profitable.

In 1894, the General Assembly of Ohio "reserved Licking Summit Reservoir" for a public park to be known as "Buckeye Lake". Hence the name Buckeye Lake.

Over the years, eons, ages or whatever you wish to call the passing of time, many changes have been made on, in and around Buckeye Lake. One of the strongest forces in maintaining Buckeye Lake's high level in the resort class is Buckeye Lake Yacht Club, in spite of many disturbing outside forces.
